Lions Club Drink Can Recycling Bin to Remain Behind Town Hall

Dear Fenwick Island Resident,

The Town of Fenwick Island and the Fenwick Island Lions Club want you to know that while the Town is implementing a voluntary recycling program and will remove the recycling bins from behind the Town Hall, this does not include the Fenwick Island Lions Club aluminum drink can recycling bin. This will remain, as will the Club's bins at Lighthouse Liquor on Rte. 1, and on Rte 54 at both Marvin's and Uncle Willie's. Collection receptacles along the beach in Fenwick Island will also remain during the summer months. The Club's program has the support of the Town of Fenwick Island, and for this we are most grateful.

The Fenwick Island Lions Club has had an aluminum drink can recycling program since 1987 and it has grown to be the largest ongoing fundraising effort of our organization.

Money raised from this program helps the Club sponsor several scholarships each year that are awarded to deserving Indian River High School seniors. The funds also provide needed financial support for the Club's participation in various local and international sight, vision and "leader dog" programs and other worthwhile causes within the communities we serve. For instance, this past year, the Fenwick Island Lions Club—once again—took the lead in a vision screening program for all pre-school, Headstart and kindergarten children in Sussex County to test for amblyopia, or "lazy eye," a serious affliction that is easily treatable and curable, if caught early.

We hope that everyone in Fenwick Island will help the environment by recycling—and at the same time—support our efforts to fund our service programs.

Our thanks for your support.
